

CAROLINA SHINE EQUIPMENT
24-HOUR SELF-SERVICE PET
WASHING MACHINE BROCHURE

Intelligence creates future

Product Overview

In the midst of a busy life, giving pets a bath has become a headache for many pet owners. Our self-service pet washing machine is specifically designed to solve this problem, making pet bathing both easy and fun. Whether it's a long-haired dog with matted fur or a mischievous and active cat, this machine can handle the situation perfectly.

Key features

Disinfect

Rinse

Shampoo

Conditioner

Blow Dry

Core Functions

1. Height-Adjustable Lifting Design

Foot-pedal controlled lifting system allows the bathtub height to be easily adjusted to a comfortable working level for pet owners.

2. Intelligent Control System

Automatically regulates water temperature, water pressure, and air temperature/power to ensure safe, comfortable bathing without overheating or chilling pets.

3. Automatic Shampoo Mixing

Built-in shampoo container mixes water and bath liquid proportionally to create rich, fine foam for deep cleaning and easy rinsing, minimizing skin irritation.

4. Disinfection Function

Atomized disinfection effectively sterilizes the bathtub, ensuring a hygienic bathing environment for pets.

5. Dual Blower Drying System

Dual built-in blowers significantly reduce drying time after bathing.

Usage Process

1. Preparation

Activate the disinfection function for 2–3 minutes. After the mist dissipates, guide the pet into the bathtub, fasten the leash, and close the door.

2. Select Mode

Use the control panel to select the desired washing and care functions as needed.

3. Clean Water Rinse

Adjust the water temperature on the panel. Use the shower head with a soft brush to rinse and comb the pet's fur simultaneously.

4. Shampoo Wash

Press the shampoo function button. Shampoo will be dispensed automatically through the shower head. Adjust the temperature as needed, then rinse with clean water and towel-dry excess moisture.

5. Blow Drying

Activate the blow-drying function and adjust wind power and temperature. Turn on the auxiliary dryer if needed. The dual blower system ensures faster drying.

6. Finish & Release

Press the settlement button to complete the process. Open the bathtub door and release the pet.

Specification

Equipment Parameters	
Size	3.9 x 3.6 x 6.1ft
Weight	441 lb
Voltage	208V/60Hz (Customizable)
Max. Power	7500W
Standby Power	3-5W
Cabinet	Outdoor Galvanized Waterproof And Sun-Proof
Bathtub	304 Full Stainless Steel
Billing Method	Flow / Time / Package

Device Configuration
